

Question 6 (translated from French):

"A community wind energy project is defined as a project that: - is recognized by the RCM where the project is located" The question is as follows: Can a RCM , by resolution, recognize more than one project of 25 MW on its territory?

Answer 6:

Yes. A RCM can recognized more than one project of 25 MW on its territory.

At Step 2, each project will be evaluated individually. At Step 3, Hydro-Québec Distribution will ensure that the combinations of bids being analysed respect the limit of 25 MW that can be granted on the territory of the same RCM.
