

Question 10 (translated from French):

In Section 3.7.5, it is mentioned : "the information required for the modeling of the electrical behaviour of the wind energy technologies must be transmitted to the Official Representative by the designated wind turbine manufacturer no later than July 1, 2009".
Can a bidder pass on this information in the wind turbine manufacturer's name?

Answer 10:

No. Only a wind turbine manufacturer can pass on, through the Official representative, the information allowing the modeling of the wind turbines electric behaviour and before the date indicated to the article 3.1 of the document of calls for tender at the latest. This aims at making sure that a direct exchange can be made between the wind turbines manufacturer and Hydro-Québec TransÉnergie, when it has technical questions concerning the wind turbines and their conformity to Hydro-Québec TransÉnergie's requirements.
