

**Question 11 (translated from French):**

Must a wind turbine manufacturer already selected in the previous call tenders (2000MW) resubmit the wind turbine modeling before July 1<sup>st</sup> 2009? Can the manufacturer certify by letter that he has already submitted the information requested in the present call for tenders and confirm that the proposed wind turbine still complies as of today?

**Answer 11:**

A wind turbine manufacturer must submit, through the Official Representative, the information allowing the modeling of the wind turbine electric behaviour and before the date indicated in Section 3.1 of the call for tenders document, at the latest.

If a wind turbine manufacturer has already submitted the modeling of the wind turbine electric behaviour, it shall attest in writing the following elements:

1. That the electrical behaviour of the wind turbine complies to the technical requirements specified in the present call for tenders;
2. That the modeling was already submitted to Hydro-Québec and adequately represents the behaviour of the wind turbine.
