

**Question 19: (translated from French)**

Does the wind data required in the present call for tenders be absolutely captured during the years 2009-2010? For example, is it possible to reuse the wind data presented in the 2nd call for tenders?

**Answer 19:**

The bidder may use wind measurements from previous years if they meet the requirements of section 2.2.10, that is to say for a duration of at least eight months, including the period beginning from December 1 in a given year and ending on March 31 the following year.
