

Question 46: (translated from French)

To ease the graphical representation of the project (Appendix 12, Section 3.2.2), is it possible to replace the boundaries of an Unit of assessment (HQ_unite_eval) and file number or numbers of Unit of assessment (HQ_unite_eval_T) by the boundaries and unit numbers of lots and / or parts of lots?

Answer 46:

As mentioned in Section 3.2.2, the boundaries of an Unit of assessment (HQ_unite_eval) and file number of an Unit of assessment (HQ_unite_eval_T) must be found on the digital map of the project. However, it is not required to replicate these elements on a paper map.
