

**Question 62: (Translated from French)**

The wind turbines manufacturers had until last February 15 for filing the registration form. Please send us the names of manufacturers who can claim to be « designated ».

**Answer 62:**

The list of registered potential bidders and wind turbines manufacturers is confidential. A confirmation of registration has been issued to each registered manufacturer. You can request a copy of this confirmation to the manufacturer(s) with whom you are negotiating the supply of wind turbines for your project.

It is important to understand that hydro-Québec Distribution does not « designate » any manufacturer. It is the bidders who designate the manufacturer(s) with whom they chose to realize their project.
