

QUÉBEC: HOME TO CLEAN CLOUDS

HYDRO-QUÉBEC: LEADING THE CLEAN ENERGY REVOLUTION

HYDRO-QUÉBEC AT A GLANCE

Hydro-Québec generates, transmits and distributes electricity. We're the largest electricity producer in Canada and one of the world's leading hydropower producers.

www.hydroquebec.com/data-center

Hydro-Québec's Daniel-Johnson dam upstream of Manic-5 generating station (1,596 MW) in the Manicouagan valley, Québec, Canada.

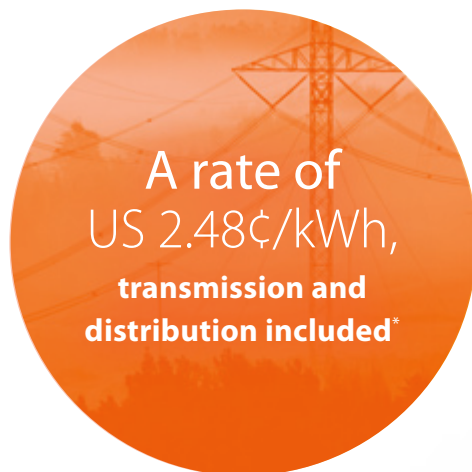

QUÉBEC: THE IDEAL PLACE TO DEPLOY YOUR DATA CENTER

Québec boasts one of the lowest and most stable electricity rates in North America. Seize the opportunity to plug into a host of benefits.

Outstanding sites

with ready access to plenty of energy, major highways and the Montréal international airport.

A business friendly environment

Significant support and incentives from the Québec government and from allies in a dynamic business community

*Assumptions:

Exchange rate: C\$1 = US\$0.80, as at July 28, 2017.

Rate LG (large power) effective April 1, 2017 for 120-kV supply with 95% load factor; includes Economic Development Rate reduction of 20%, followed by gradual transition to undiscounted Rate LG over three years before the reduction expires in 2027.

Additional credits for the total suppression of winter power demand under the Demand Response program.
