

New for rates D and DM

More kilowatthours at the lower price

Starting April 1, 2017, you are entitled to an additional 3 kilowatthours (kWh) a day at your rate's **lower price**.

This translates into savings of almost 35% on these 3 kWh per day. That's **up to 90 kWh per month more** billed at the lower price.

Rate increase lower than inflation

For the second year in a row, Hydro-Québec has upheld its commitment by keeping the rate increase below inflation. The Régie de l'énergie authorized an increase of 0.7% for residential customers and most business customers, starting April 1, 2017.

For more information on your rate, visit hydroquebec.com/rates.
