

# TRANSFLEX Distribution Transformer Kernel

A transformer assembler low-cost outsourcing solution for making distribution transformers

## ***TRANSFLEX kernel outsourcing advantages for distribution transformer assemblers***

- › Low-cost solution for assembling baseline-DOE-compliant transformers for utilities making their purchase decision based on first-cost
- › Low-cost solution for assembling high-efficiency transformers for utilities making their purchase decision based on TOC
- › Low-cost kernels available with few container purchase order
- › Product cost benefits equally accessible to small and large transformer assembly plants
- › Allows any assembly plant to produce both DOE-compliant and high-efficiency transformers to meet market demand.
- › Compatible with a just-in-time supply chain
- › Robust construction
- › Increased product reliability
- › Kernel with preformed secondary leads ready-to-connect to the tank bushings
- › Easy kernel handling and tanking
