

Cue Card 2007-2008

Hydro-Québec generates, transmits and distributes electricity, mainly using renewable energy sources, in particular hydroelectricity. Its transmission and distribution activities are regulated by the Régie de l'énergie du Québec. To meet growing demand, it is continuing to develop hydropower, complemented by wind power purchased from independent producers.

In addition, it conducts research and develops new technologies in energy-related fields. It also actively promotes energy efficiency. Hydro-Québec's sole shareholder is the Québec government, which guarantees most of its borrowings.

(1) Certain comparative data have been reclassified to reflect the presentation adopted for 2007.

(2) As of 2007, the Corporation has been required to pay water-power royalties under the terms of the Watercourses Act. For 2007, a transition year, the half-rate rule applies.

(3) Hydro-Québec also has access to almost all the output from Churchill Falls generating station (5,428 MW) and purchases all the output from seven privately owned wind farms with a total installed capacity of 420 MW. In addition, 1,222 MW are available under agreements with other independent suppliers.

Hydro-Québec: A quality investment

Security

Explicit guarantee by the Québec government on the major portion of Hydro-Québec's debt (debentures, commercial paper, medium-term notes)

Characteristics of the debt at December 31, 2007

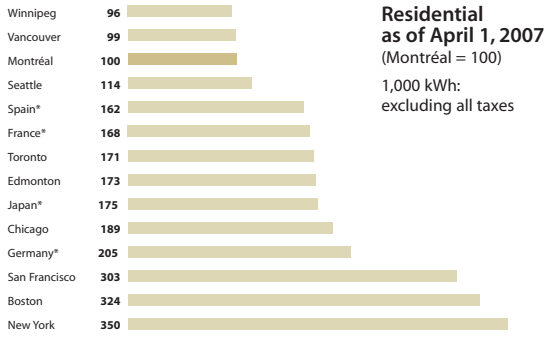

Average term: 18.0 years
Fixed rate: 92.2%; Variable rate: 7.8%
Breakdown by repayment currency: C\$90.8%; US\$ 9.2%

Strong credit ratings (December 31, 2007)

Long-term debt: Moody's Aa2; Standard & Poor's A+; Fitch Ratings AA-; DBRS A (high)
Commercial paper: Moody's P-1; Standard & Poor's A-1+; Fitch Ratings F1+; DBRS R-1 (middle)

Highlights 2007-2008

- Hydro-Québec launched construction of the major Eastmain-1-A/Sarcelle/Rupert project at James Bay. It will add 893 MW and 8.5 TWh to our generating fleet.
- In September, Hydro-Québec commissioned the 51-MW Mercier generating station.
- Commissioning of the 385-MW Péribonka generating station in the Saguenay–Lac-Saint-Jean region, completed in the first quarter of 2008.
- In September, Hydro-Québec Distribution had received 66 bids from 30 proponents in response to a tender call issued in 2005 for the supply of 2,000 MW of wind power.
- According to a study by J.D. Power and Associates, Hydro-Québec ranked highest among large Canadian utilities (650,000 customers or more) for residential customer satisfaction in 2007. This ranking is based on the responses of approximately 500,000 customers of the country's 14 largest electric utilities.
- The Régie de l'énergie approved a 2.9% across-the-board increase in the rates of Hydro-Québec Distribution for the 2008–2009 rate year, effective April 1, 2008.
- The Régie approved a transmission rate adjustment for 2008, retroactive to January 1, 2008.
