---

### ABSTRACT:

This document illustrates the distribution of the 36 freshwater fish species found in the James Bay and Northern Québec Territory. The distribution maps originate mainly from the inventories carried out on this territory by the Société d'énergie de la Baie James and Hydro-Québec between 1973 and 2000. These inventories cover 2 201 fishing stations and provided some 570 000 fish. Data analysis extended the known distribution of several species.

**Key words:** fish, distribution, James Bay Territory, Northern Québec

**Distribution list:** Cree Regional Authority, Makivik Corporation, ministère de l'Environnement du Québec, Société de la Faune et des Parcs du Québec, Fisheries and Oceans Canada, James Bay Advisory Committee on the Environment, Hunting, Fishing and Trapping Coordinating Committee, Royal Ontario Museum, Canadian Museum of Nature.
