

*Your measurement and testing equipment plays a crucial role in your operations. This is why you need to be able to count on reliable measurements at all times. Hydro-Québec's research institute's Calibration and Repair Laboratory offers you calibration and repair services of the highest quality. Backed by their high-tech expertise in metrology and repairs, our metrology technicians are offering you not just services, but solutions.*

An appropriate maintenance program is crucial for ensuring that your measuring equipments continue to be reliable and perform well. Let our experts handle the calibration and repair of your equipment.

#### **A wide range of calibration services**

Recognized for the quality and speed of their services, our metrology technicians, who have solid expertise in measurement and uncertainty evaluation, can calibrate a wide range of measuring equipment. Reference standards of the highest metrological quality are used for calibration. In addition, our scope of accreditation is extensive and generally covers all industry needs.

#### **Calibrated equipment**

- Capacitors
- Voltmeters
- Ammeters
- Multimeters
- Wattmeters
- Sensor calibrators
- Power quality analyzers
- Oil analyzers
- Temperature sensors
- Frequency counters and generators
- Resistors
- Current transformers
- Voltage transformers
- Etc.
