

To be completed by the Installer:

Installation location address (apartment/number/street/city/province)		Postal code
Make and model of the installed central heating Electric Thermal Storage (ETS) system (e.g., Steffes 4120)		
Brand of heat pump	AHRI number of heat pump	
Model number of heat pump	Meter identification number starting with: G4, G7, G8 or G9	
Central heating ETS system activation date		
Installation company's name		NEQ*

*Quebec enterprise number

I certify:

- That the central heating ETS system has been programmed according to the specifications set out by Hydro-Québec, and that only the parameters listed on the “*Hydro-Québec Serenity Setup*” form might have been modified.
- That all central heating ETS system peripherals (heat pump, humidifier and recirculating pump, dust collector, etc.) were inspected prior to installing said system and that the Participant was informed of their condition;
- That the manufacturer’s internal clock, has been installed and set up correctly (actual time, date, year, day of the week).
- That quality control has been carried out to verify the proper working order of the central heating ETS system and heat pump (if relevant);
- That the Participant has been given a verbal explanation on how the central heating ETS system works, including:
 - The meaning of the information on the display
 - The location of the external temperature sensor
 - The system’s general maintenance, including changing the air filter
 - The location of the breaker and the maximum duration of interruption to maintain the clock’s programming
- That all documentation relative to the central heating ETS system has been given to the Participant.

I, the undersigned, do solemnly declare that the information provided in this document is true and correct.
