

ADDENDUM

Conditions of Service 2021

Conditions related to the conversion to dual energy of a natural gas heating system under the offer by Hydro-Québec and Énergir

In decision D-2022-079, the Régie de l'énergie approved new terms and conditions related to the conversion to dual energy of a natural gas heating system under the offer developed by Hydro-Québec and Énergir to promote sustainable decarbonization.

This addendum sets out the terms and conditions approved by the Régie de l'énergie, effective June 15, 2022.

CHAPTER 8

SUBMISSION OF CONNECTION REQUEST AND DETERMINATION OF WORK INCLUDED IN BASIC SERVICE

ADDITION OF “CONNECTION REQUEST FOR THE CONVERSION OF A NATURAL GAS HEATING SYSTEM TO A DUAL-ENERGY SYSTEM” IN SECTION 8.1

8.1 Connection request

<p>Connection request for the conversion of a natural gas heating system to a dual-energy system</p>	<p>If you are an existing <i>customer</i> of Hydro-Québec and Énergir and your <i>connection request</i>:</p> <ul style="list-style-type: none">- involves the conversion of a natural gas heating system to a <i>dual-energy system</i> that uses electricity and natural gas as energy sources; and- requires electrical work related to the <i>distribution service loop</i> or the <i>distribution line</i>, <p>all such work will be done free of charge, except any options that you may request.</p> <p>In addition, the \$360 “charge for work on the system” indicated in Table I-A, Chapter 20, will not be billed to you.</p>
