

# ADDENDUM

## Conditions of Service 2019

### **Special charge for connecting to an off-grid system**

The Régie de l'énergie approved modifications to the terms regarding the special charge for connecting to an off-grid system.

This addendum sets out the conditions and rates approved by the Régie de l'énergie, effective April 1, 2020 (decision D-2020-019 of the Régie de l'énergie).

## CHAPTER 9

---

# Calculation of the Amount to Be Paid for Work Not Included in Basic Service

## MODIFICATION TO SECTION 9.7.5

### 9.7.5 Special charge for connecting to an off-grid system

If your *connection request* concerns an *off-grid system* located north of the 53<sup>rd</sup> parallel, and is for electricity for space heating or water heating, you must pay the applicable “special charge for connecting to an *off-grid system*” indicated in Table I-A, Chapter 20, instead of the “charge for work on the system.”

This charge also applies in the case when a space or water heating system is converted to electricity.

It does not apply if your *connection request*:

- concerns the Schefferville system;
- is for temporary use of electric heating devices to dry joints and paint during construction work;
- is for a service contract eligible to the Dual-Energy Domestic Rate – Inukjuak System.
