Project News

Update on ongoing work at the former site of the Institut des Sœurs de Miséricorde

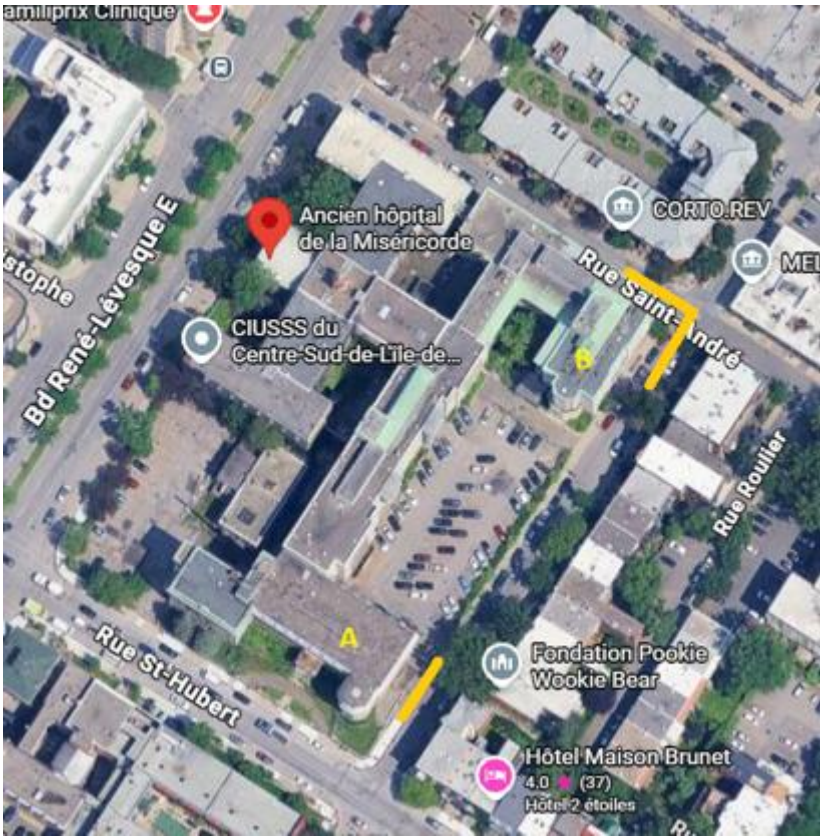

You may have noticed increased activity in recent weeks at the former site of the Institut des Sœurs de Miséricorde. We are currently conducting additional inspections and analyses of the buildings and grounds to better document their condition.

Initial inspections have shown that we must take certain steps to protect workers, members of the public and the buildings themselves.

Securing building façades

Interventions are required in two locations:

- **Building A, at the corner of De La Gauchetière and Saint-Hubert**: As a precautionary measure given the risk of falling debris from the façade, a section of the sidewalk on Rue De La Gauchetière will be temporarily closed until a walkway is installed.
- **Building C, at the corner of De La Gauchetière and Saint-André**: Metal protective barriers will be installed to catch potential falling debris. The work will cause temporary street and lane closures on both Rue Saint-André and Rue De La Gauchetière.

Project News

Update on ongoing work at the former site of the Institut des Sœurs de Miséricorde

Reinforcing site security

Because trespassers have repeatedly entered the buildings, the fencing around the block will be heightened to better control site access.

Relocating the site office

To ensure the safety of workers, the site office will be moved to a trailer set up in the parking lot facing Rue De La Gauchetière.

Continuing soil testing

Additional soil testing will take place in the parking lot facing Boulevard René-Lévesque during the week of November 16.

These measures are part of ongoing site inspections and assessments. We thank you for your patience and understanding while this work is underway.
