

Project News

Upgrading the power transmission system between Saraguay and Reed (Toupin) substations and construction of a new substation

December 2025 – Preparatory work

Hydro-Québec is planning to build a new line and substation in your area. This project aims to ensure the long-term operability of the grid, increase capacity and improve service quality. Preparatory work involving soil analyses will be necessary to carry out this project. To perform the analyses, Hydro-Québec will need to access the land located behind your home.

Please note that no service interruptions are anticipated as part of this work.

Schedule

December 2025 to February 2026.

Description of the work

The preparatory work consists of technical surveys to study the soil's composition.

Work area

The work will take place on private land located on Rue Duchesne (see map on reverse).

Impacts of the work

This work will have some impacts on residents, including:

- Noise
- Clearing of bushes to provide machinery with access to the land

Mitigation measures

- Residences and businesses will remain accessible throughout the duration of the work.
- No service interruption
