Work Information

Upgrades to the power transmission system between Saraguay and Reed substations and construction of Toupin substation

Hydro-Québec is planning to build a new transmission line in your area. This project aims to ensure the long-term operability of the grid, increase its capacity and improve service quality. Preparatory work involving soil tests is required. To carry out these tests, Hydro-Québec will need to access the land located behind your home.

If you are a property owner with tenants living in the area, please forward this notice to them.

Work schedule

November and December 2026.

Nature of the work

The preparatory work consists of technical surveys to study the soil's composition. Drilling will be necessary to extract the samples.

Work area

The work will be carried out along the proposed line route.

Impact of the work

This work will have some impacts on residents, including:

- Noise
- Cutting down branches and trees to allow machinery to access the property

Mitigation measures

- Uninterrupted access to homes and businesses
- No service interruptions
