## Construction of an underground 315-kV transmission line between Guy and Des Irlandais substations

Work – April to July 2026

To meet growing demand for electricity and ensure the long-term operability of its facilities on the island of Montréal, Hydro-Québec is building an underground transmission line between Guy substation and the new Des Irlandais substation.

### Description of the work

Major work to build the underground concrete duct banks and rebuild the roadway will take place on **Saint-Patrick, Bridge and Wellington streets** from late April through early July 2026.

The work will be carried out in several successive phases to keep impacts to a minimum. However, temporary disruptions to traffic and certain access points should still be expected.

### Work periods and areas

April 22 to May 11, 2026:	Rue Saint-Patrick (between de Montmorency and Bridge)
May 29 to June 15, 2026:	Intersection of Saint-Patrick and Bridge
June 2 to 19, 2026:	Rue Bridge (between Saint-Patrick and Wellington)
June 19 to July 6:	Intersection of Wellington and Bridge

### Work impacts

- **Temporary disruptions** on Saint-Patrick, Bridge and Wellington streets
- **Full or partial closure of certain intersections** as work progresses
- Temporary adjustments to **traffic lights**
- **Possible impacts on public transit**, including STM bus routes 61 and 74

### Mitigation measures

- Safety and mobility will be ensured through **signage and ongoing monitoring**.
- **Detours** via Rue de Condé and Rue Centre **have been planned and will be clearly marked**.
- To facilitate construction site access, **trucks will be temporarily permitted on** Rue Charlevoix and Rue Centre.
- In cooperation with the **STM, bus routes 61 and 74 will be adjusted** to ensure service continuity.

*Note: No service interruptions are anticipated at any stage of the work.*
