Upgrading the underground power distribution system in the Avenue King-Edward area

Phase 1 – Spring/summer 2026

To improve the quality of electricity service, Hydro-Québec will be carrying out upgrades to the underground power distribution system near you.

The work will take place on Chemin Baily, Avenue King-Edward, Avenue Montclair and Chemin de la Côte-Saint-Luc.

Please note that no service interruptions are anticipated as part of this work.

Description of the work

The work will include installing new underground duct banks and installing and rebuilding underground vaults.

Other phases of the work are planned. The residents affected will be informed in advance of each phase.

Project schedule

The work will take place from June until the end of October 2026.

Impact of the work

To carry out this work, Hydro-Québec will need access to land within the public right-of-way.

Traffic restrictions will be in effect during the work.

Mitigation measures

- In the event of obstructions in front of private parking spaces, the residents affected will be informed three days in advance.
- No service interruptions are anticipated as part of this work.
- When the work is completed, Hydro-Québec will restore the site.
- Waste collection services of all types will be maintained.
- A liaison officer will be available to answer your questions and address your concerns.
