Val-des-Monts substation and supply line – Start of work – Chemin de la Savane

January 2026

To meet future needs driven by the growing demand for electricity in the region and improve the reliability and quality of the power system, Hydro-Québec is building a new 120/25-kilovolt (kV) substation in Val-des-Monts, on Chemin de la Savane. To supply the facility, Hydro-Québec will also construct a new 120-kV supply line between the future substation and an existing line in the municipality of Val-des-Bois.

After several months of planning, we are ready to start the preparatory work for the upcoming construction of the new substation.

In the coming weeks, work will get underway on Chemin de la Savane:

- Clearing a corridor for a new three-phase overhead distribution line
- Installing 150 wood and composite poles
- Installing conductors over a distance of about seven kilometres

Work area

- Chemin de la Savane: **between chemin du Marais et chemin du Pont**

Work schedule

- Monday to Friday, 7 a.m. to 5 p.m.
- Starting in January 2026 and throughout the year

Impacts of the work

- Partial road closures in the work area
- Traffic redirected as needed
- Noise from machinery during certain operations

Mitigation measures

- Installation of appropriate signage
- Uninterrupted access to residential buildings – **local traffic only**
- Uninterrupted access to vehicle entrances and driveways – **local traffic only**
- Signallers to direct traffic around the work site
