Val-des-Monts substation – Clearing of the supply line corridor

August 2026

To meet the growing demand for electricity in the area and improve the reliability and quality of the power system, Hydro-Québec is building a new 120/25-kilovolt (kV) substation in Val-des-Monts, on Chemin de la Savane. To supply the facility, Hydro-Québec will also construct a new 120-kV supply line between the future substation and an existing line in the municipality of Val-des-Bois.

Over the next few days, we will be conducting work in the corridor of the future supply line.

Description of the work

- Construction of access roads
- Clearing of the supply line corridor

Work area

- Between the future substation, at **170 Chemin de la Savane**, and along the 4.7 kilometres of the line corridor
- Along the 8.4 kilometres of access roads

Work schedule

- Monday to Friday, 7 a.m. to 5 p.m.
- Between late August and late October

Impacts of the work

- Heavy vehicle traffic
- Hauling of granular material
- Hauling of timber
- Noise from machinery

Mitigation measures

- Installation of appropriate signage
