

## Transmission of information to those responsible for reliability

Certain reliability standards require entities to share data with those responsible for reliability or with the Network Planner. The following table provides contact information to be used to send information according to the type of data.

Requirements	Mailbox / modality
Transmission of data and information necessary for the operation of the transmission network of Quebec under the TOP-003 and IRO-010 standards and other standards that govern sharing of requested information and data	<a href="mailto:CMEDonneespourlafiability@hydro.qc.ca">CMEDonneespourlafiability@hydro.qc.ca</a> <a href="#">Document URL IQ-N-002</a>
Transmission of data for network modeling under MOD-032 and other standards that govern sharing of information and requested data.	<a href="mailto:TEdonneesdemodelisation@hydro.qc.ca">TEdonneesdemodelisation@hydro.qc.ca</a>
Procedures for coordinating studies and notification to those responsible for reliability relating to the connection of the installation to the Hydro-Québec network under standard FAC-001	<a href="#">Transporter's Website</a>
