

Standard TOP-001-3 — Transmission Operations

Appendix QC-TOP-001-35-QC-1

Provisions specific to the standard TOP-001-3 applicable in Québec for standard TOP-001-5 – Transmission Operations

This appendix establishes specific provisions for the application of the standard in Québec. Provisions of the standard and of its appendix must be read together for the purposes of understanding and interpretation. Where the standard and appendix differ, the appendix shall prevail.

A. Introduction

1. **Title:** ~~No specific provisions~~ **Transmission Operations**

2. **Number:** ~~No specific provisions~~ **TOP-001-3**

3. **Purpose:** No specific provision

4. **Applicability:**

Functions

No specific provision

Facilities

~~With the exception of Requirement R10.6, the applicable facilities for this standard are the facilities of the Main Transmission System (RTP). This standard only applies to the facilities of the Main Transmission System (RTP).~~

5. **Effective Date:**

5.1. Adoption of the standard by the Régie de l'énergie: Month xx, 202x

5.2. Adoption of the appendix by the Régie de l'énergie: Month xx, 202x

5.3. Effective date of the standard and its appendix in Québec: ~~Month xx, 202x~~ **April 1, 2022**

All requirements become effective on August 1, 2022.

~~6. — Background~~

~~No specific provision~~

B. Requirements and Measures

Specific provisions applicable to requirement R3 for Distribution Provider:

If the Operating Instruction issued to the Distribution Provider requires a load shedding, the load shedding required is equivalent to a reduction in net transfer from Québec's system to the entity's load. Depending on the load shedding required, the Distribution Provider may have to reduce net transfer to zero.

Specific provisions applicable to Requirement R10.1 and R10.3:

R10.1: The Requirements only apply to the facilities of the Main Transmission System (RTP).

R10.3: The expression "non-BES" is replaced by "non-RTP".

C. Compliance

1. **Compliance Monitoring Process**
