

Register of Entities Subject to Reliability Standards

April 2014

Redacted Version

TABLE OF CONTENTS

1.	OBJECT OF THE REGISTER OF ENTITIES	3
2.	ENTITIES	3
2.1	FACTORS OF INCLUSION.....	3
2.2	IDENTIFICATION OF ENTITIES SUBJECT TO RELIABILITY STANDARDS	5
3.	APPENDICES LIST	8
4.	VERSION HISTORY	9
	APPENDIX A – ENTITY INFORMATION	10
	APPENDIX B – TRANSMISSION FACILITIES	74
	APPENDIX C – GENERATION FACILITIES.....	88
	APPENDIX D – TELECOMMUNICATIONS FACILITIES.....	92
	APPENDIX E – SPECIAL PROTECTION SYSTEMS	98
	APPENDIX F – CONTROL CENTERS.....	100

1. OBJECT OF THE REGISTER OF ENTITIES

The Register of entities aims to determine and identify the entities subject to the reliability standards in accordance with the functions of the NERC's Reliability Functional Model they assume, in order to establish the reliability standards to which they are subject.

In addition, in order to properly define the applicability of standards in Québec, the Register lists the following items related to each entity:

- Facilities of the Main Transmission System;
- Facilities of the Bulk Power System¹;
- Critical Assets ;
- Transmission lines operated at 200 kV or above;
- Facilities and equipments required for system restoration;
- Special Protection Systems classified type I or II by the NPCC.

The Register also contains information about the specifics of entities or systems that they own, such as underfrequency or an undervoltage load shedding system.

2. ENTITIES

2.1 Factors of inclusion

Entities considered for inclusion to the register are the ones that may be subject to enforcement under the reliability standards pursuant to section 85.3 of the Act respecting the Régie de l'énergie ("The Act"):

- 1° an owner or operator of a facility with a capacity of 44 kV or more connected to an electric power transmission system;
- 2° an owner or operator of an electric power transmission system;
- 3° an owner or operator of a production facility with a capacity of 50 megavolt amperes (MVA) or more connected to an electric power transmission system;
- 4° a distributor with a peak capacity of over 25 megawatts (MW), whose facilities are connected to an electric power transmission system; and
- 5° a person who uses an electric power transmission system under an electric power transmission service agreement with the electric power carrier or with any other carrier in Québec.

Electric Power Transmission System

The reliability coordinator designates the Main Transmission System (MTS) under his supervision as the electric power transmission system to which the Act refers in paragraphs 1° and 2° of section 85.3. This allows for the exclusion of the industrial customers and the owners or operators of power plants with less than 50 MVA, usually connected at 49 kV, 69 kV or 120 kV, which have no impact on the reliability of the Main Transmission System.

¹ Elements of the Bulk Power System are determined using NPCC's A-10 criteria revised on December 1st, 2009.

Production facilities

Production facilities with a capacity of 50 MVA or more (identified in paragraph 3° of section 85.3) are part of the Main Transmission System (MTS) under the supervision of the Reliability Coordinator. The owners and operators of these facilities are subject to enforcement under the reliability standards, regardless of the nature of the system they are connected to, since these entities have an impact on the reliability in terms of maintaining supply/demand balance in Québec Interconnection.

Distributors

For the purposes of maintaining supply/demand balance, the distributors identified in paragraph 4° of section 85.3 are also included in the Register of entities subject to reliability standards regardless of the system they are connected to, whether it's the main transmission system or a regional system.

Purchasing-Selling Entities

Entities identified in paragraph 5° of section 85.3 that perform brokerage activities in the wholesale energy market are considered for enforcement for the reliability standards applying to purchasing-selling entities (PSE) as defined by NERC Functional Model.

2.2 Identification of Entities Subject to Reliability Standards

The following table lists the entities subject to reliability standards and their functions in accordance with NERC Reliability Functional Model. Detailed information for each entity are presented at Appendix A.

# ¹	ENTITY (in alphabetical order)	ACRONYM	NERC ID ²	Applicable function(s) in accordance with NERC Reliability Functional Model													
				RC	BA	IA	TOP	TO	TP	TSP	PA	GO	GOP	RP	LSE	DP	PSE
1	Arcelor Mittal Montréal (Usine De Longueuil)	AMM						TO									
2	Axiall Canada Inc.	ACI						TO									
3	Cargill Energy Trading Canada Inc.	CET															PSE
4	Cartier Énergie Éolienne (AAV) Inc.	AAV										GO	GOP				
5	Cartier Énergie Éolienne (BDS) Inc.	BDS										GO	GOP				
6	Cartier Énergie Éolienne (CAR) Inc.	CAR										GO	GOP				
7	Cartier Énergie Éolienne (GM) Inc.	GM										GO	GOP				
8	Cartier Énergie Éolienne (MS) Inc.	MS										GO	GOP

		230 <input type="checkbox"/>	315 <input checked="" type="checkbox"/>
			450 <input type="checkbox"/>
			735 <input type="checkbox"/>
Installed Generation Capacity 0 MVA	Industrial Customer <input checked="" type="checkbox"/>		Generation Facility for Industrial Use <input type="checkbox"/>
The entity owns and/or operates:			
Transmission or generation facility classified as MTS	YES <input checked="" type="checkbox"/>	NO <input type="checkbox"/>	
Transmission or generation facility classified as Bulk Power System	YES <input type="checkbox"/>	NO <input checked="" type="checkbox"/>	
Assets classified as critical for CIP Standards	YES <input type="checkbox"/>	NO <input checked="" type="checkbox"/>	
Transmission lines operated at 200 kV or above	YES <input type="checkbox"/>	NO <input checked="" type="checkbox"/>	
Facility / Equipment required for system restoration	YES <input type="checkbox"/>	NO <input checked="" type="checkbox"/>	
Special Protection System classified as Type I or Type II by NPCC	YES <input type="checkbox"/>	NO <input checked="" type="checkbox"/>	
Remarks			
<ul style="list-style-type: none"> - Facility connected on line 3061 (tap-off). - 315 kV equipment including transformers T1 and T2. - Does not own an underfrequency or an undervoltage load shedding system. 			

APPENDIX A - ENTITY INFORMATION SUMMARY

Identification

Corporate Identification **Axiall Canada Inc. (Usine de Beauharnois)** Acronym **ACI**

Corporate Address

Street C.P 2010
City Beauharnois
Province / State Québec
Postal / ZIP code J6N 3C3
Country Canada

NERC ID *(Number to be assigned later by NERC)*
Website <http://www.ppg.com>

Factors of Inclusion to the Register

<input checked="" type="checkbox"/>	Owner or operator of a facility connected to the MTS
<input type="checkbox"/>	Owner or operator of the MTS
<input type="checkbox"/>	Owner or operator of a production facility with a capacity of 50 MVA or above
<input type="checkbox"/>	Distributor with a peak capacity of over 25 MW
<input type="checkbox"/>	Person who uses an electric power transmission system under a service agreement

Function(s) in accordance with NERC's Reliability Functional Model

RC <input type="checkbox"/>	BA <input type="checkbox"/>	TOP <input type="checkbox"/>	TO <input checked="" type="checkbox"/>	GO <input type="checkbox"/>	GOP <input type="checkbox"/>	IA <input type="checkbox"/>
PA <input type="checkbox"/>	TP <input type="checkbox"/>	TSP <input type="checkbox"/>	RP <input type="checkbox"/>	PSE <input type="checkbox"/>	LSE <input type="checkbox"/>	DP <input type="checkbox"/>

General Characteristics of the Facilities

Voltage Levels (kV)	<120 <input checked="" type="checkbox"/>	120 <input checked="" type="checkbox"/>	161 <input type="checkbox"/>	230 <input type="checkbox"/>	315 <input type="checkbox"/>	450 <input type="checkbox"/>	735 <input type="checkbox"/>
Installed Generation Capacity MVA	Industrial Customer <input checked="" type="checkbox"/>		Generation Facility for Industrial Use <input type="checkbox"/>				

The entity owns and/or operates:

Transmission or generation facility classified as MTS	YES <input checked="" type="checkbox"/>	NO <input type="checkbox"/>
Transmission or generation facility classified as Bulk Power System	YES <input type="checkbox"/>	NO <input checked="" type="checkbox"/>
Assets classified as critical for CIP Standards	YES <input type="checkbox"/>	NO <input checked="" type="checkbox"/>
Transmission lines operated at 200 kV or above	YES <input type="checkbox"/>	NO <input checked="" type="checkbox"/>
Facility / Equipment required for system restoration	YES <input type="checkbox"/>	NO <input checked="" type="checkbox"/>
Special Protection System classified as Type I or Type II by NPCC	YES <input type="checkbox"/>	NO <input checked="" type="checkbox"/>

Remarks

– Connected to DeLéry and Beauharnois-Est substations (L1437).
– Backup supply on line 1436.
– 120 kV equipment including transformers T1 and T2.
– Does not own an underfrequency or an undervoltage load shedding system.

APPENDIX A - ENTITY INFORMATION SUMMARY

Identification							
Corporate Identification	Cargill Energy Trading Canada Inc.		Acronym CET				
Corporate Address							
Street	9350 Excelsior Boulevard MS 150						
City	Hopkins						
Province / State	Minnesota						
Postal / ZIP code	55343						
Country	United States
